Prior to CAD, our hand lettering standard was 1/8" text height to remain legible for half-size sets. After CAD was introduced, since the computer-generated, plotted output provided more clarity, we reduced our text height standard to 3/32" to gain more real-estate in our drawings, which reduced sheet count in the sets, thereby passing more savings to our clients.

Engineering Drafting Lettering Guide

Lettering, when used in drafting, is a difficult art to master. For this reason, computer word-processing programs, which ensure neat and uniform letters, are more widely used today than hand-lettering. Even so, many cartoonists, architects, engineers and others prefer to use traditional hand-lettering in their crafts.

Lettering Styles in Drafting | Our Pastimes

In lettering 'A' type, the height of the capital letter is divided into 14 parts, while in lettering 'B' type, it is divided into 10 parts. The height of letters and numerals for engineering drawing are generally in the range of 2.5, 3.5, 5, 7, 10, 14 and 20 mm according to the size of drawing. Table 1 Lettering 'A' (d=h/14)

Basics of Engineering Drawing - hostgator.co.in

Rest your lettering guide on your T-square. Line the first hole up to the spot where you want your lines to start. 4. Place a sharpened pencil in the top hole and glide the guide and pencil to the right. 5. Without adjusting the t-square or lettering guide, place the pencil in the second hole and glide it to the left.
